## Smoker's Cease Fire® Cigarette Butt Receptacle

Keeps your property clean and reduces the chance of fire

- Fire tested and approved by FM Global
- Interlocking lid lifts off for easy emptying of inside bucket
- Ideal for entryways, smoking areas, and public grounds

The safe and convenient answer to cigarette butt disposal is the Original Smoker's Cease Fire® Cigarette Butt Receptacle. Its innovative, self-extinguishing design safely collects unsightly cigarette litter and reduces the risk of fire. This low maintenance smoker's friend is made of flame-retardant, sturdy polyethylene and won't rust, dent, or crack. A unique rain-bonnet opening keeps rain out and discourages other trash. To empty the four gallon galvanized steel pail inside, simply unscrew the back knob and lift the lid. Integrated tie-down notches offer security and greater stability under severe weather conditions. The internal construction of the patented "drip-lip" prevents tar condensation from escaping in high humidity environments, and keeps the exterior clean from messy drip marks.

The Optional Disposable Bucket Liner eliminates the need to "shake out" nasty butts. When this special burn-resistant liner is full, simply use the twist ties that are included and discard it!

An Optional Anchoring Cable Kit with Padlock offers added security. Attach 3/8" (914mm) wire rope cable around a railing, pole, or fence and then attach cable end and padlock to the tie-down notch at the base of the unit.
