In the last three years Zoro Tools has progressed from a six-person organization operating out of a 2,000 sq. foot facility and offering fewer than 100,000 products to a 75+ person organization offering more than 400,000 unique products and destined for a new 65,000 sq. foot facility.

Imagine what we could do together in the *next* three years.

To support our plans for expansion in 2014 and beyond we are searching for an open source developer. This position will work out of our facility located in Buffalo Grove, Illinois. In this position you will contribute effective Python and web coding to help optimize customer acquisition and retention results. These results will be driven largely by your contributions in one (or more) of four key areas: development, web user interface, API, or analytics. Zoro Tools searches for entrepreneurial-minded talent that thrives in a collaborative environment focusing on collective solutions that drive additional business and continually improves the customer experience.

Those interested can forward a resume directly to bruce.simmons@zorotools.com.

Our technical environment supports:

- A strong commitment to Open Source technologies such as Python, Hadoop, MongoDB, Django.
- An infrastructure that runs in the Amazon Cloud
- Using our tools to build innovative eCommerce solutions for our world-wide business in industrial maintenance, repair and operations products.

Our culture supports:

- Working collaboratively in an atmosphere of teamwork, trust and full transparency about the business
- Working on everything – from infrastructure to programming to data analytics
- Working one-on-one with the business solving problems together
- Learning new tools and skills everyday
- Having the freedom to experiment with cool technology and ideas
- Getting stuff done, having fun and having time for our families

If you are familiar with any of the open source technologies listed above, SQL databases, Linux, are comfortable in a "fail fast and iterate" environment and would like to learn more, simply forward a resume to bruce.simmons@zorotools.com.
